Our unique geology and climate make Wealden a front-runner in world-class winemaking.

A visit to one of the many beautiful Sussex vineyards will be high up the list for both connoisseurs and curious wine-lovers alike.

Many of the vineyards in the area welcome visitors and offer tours and tastings. Please note some visits are by appointment only, so please contact them before your visit for full details.

Wealden District is situated in the south east corner of England, one of the sunniest regions of the British Isles. It has seen a boom in wine growing in recent years now boasting over 20 vineyards across the beautiful rolling Sussex countryside.

The lime chalk soil, prevalent throughout Sussex, is the same soil type found in the Champagne region of France. The other soil is a medium loam over Wealden clay and is very well drained, and both contributes to Wealden's ability to produce quality grapes for sparkling wines.

A cooler climate than France helps preserve the acidity in the grapes that is needed to make the top tier of sparkling wines.

The classic Champagne varieties of Chardonnay, Pinot Noir and Pinot Meunier thrive in the Wealden terroir. Other grape varieties, Bacchus, Pinot Gris, Rondo and Regent; are being cultivated for the production of still wines. These are mostly aromatic whites but some rosé and red wines are also being made as the area becomes one of the most significant wine growing regions in the country.
